## TE Connectivity

**Product Change Notification:** PCN-22-133111

**PCN Date:** 06-APR-22

TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

**General Product Description:**  
AMPSEAL 14P, 23P, & 35P Headers - Molding, Stamping, Plating, and Assembly Supplier Addition

**Description of Changes**  
The Industrial and Commercial Transportation business unit of TE Connectivity is adding new molding, stamping, plating, and assembly capabilities at approved TE vendors in China. This will apply to the vertical and right angle 14P, 23P, & 35P AMPSEAL headers for the part number(s) listed below. This change is necessary to increase production capacity and meet customer demand. The added tooling does not impact connector performance. **IMPORTANT:** No fit, form or function change. Parts off the new lines are identical to current production. Product drawing(s) are not affected. These PNs are TE proprietary designs and are therefore considered catalog/general market products. PPAP and/or sample requests must be submitted within 14 days of PCN submission via [ict-ppap-request@te.com](mailto:ict-ppap-request@te.com) or ePPAP system. Submission will not occur without request. If PPAP is requested, disposition response is required within 14 days of submit date or it will be considered approved. Shipments from current and new tooling configurations may be mixed.
